Professor Wildows is again occupying the musical field. He proposes to organize and give a grand musical festival, lasting for one wook, commencing about May 10, the proceeds to be given to such charitable institutions of the District as will appoint committees to ob-tain a sufficient number of subscribers to guarantee the expenses. The festival is to consist of oratorio and orchestral performances. There will be four subscription performances, the subscription price being \$5, including a reserved seat. There is to be a public rehearsal, to which an admission fee will be charged sal, to which an admission fee will be charged; one or more matinees and a popular concert to wind up with. The orchestra is to be com-posed of many of the leading New York artists—with whom the Professor is in com-munication—as well as some of the best vocal and instrumental soloists. As there is at presnumber of persons that might reasonably be expected to be called togother by the music or for the sake of charity, the Professor is in negotiation with John Albangh, esq., for the use of the National Theatres for the occasion, and is now planning to convert the stage and auditorium into a large music hall, so that from 1,000 to 1,800 persons can be accommodated at each oratorio or instrumental per-formance. The Professor is an ontifusiast in this matter, and is willing to give all his spare time to the work. It is to be hoped, therefore, that his project may meet with responses sufficient to enable him to carry it out success-

Wants to Kill Himself.

A little boy who lodged at the Fifth pre-cinct station-house Thursday night, and there gave his name as John Smith, of Chicage, is letained at Police headquarters, it being sup-posed that he ran away from home. Yesterday he stated that his name was Samuel Law-son, and that he resided with his sister in New York, but inquiry by telegraph in New York failed to substantiate his story. When he came to Washington two or three days ago he apeared to be well supplied with money. He announced his attention yesterday afternoon of onding his life, and he removed his susoders, it is believed, for the purpose of choking himself. These being taken from him, he tore up the pillow-cover and attempted to make a noose of it. Being frustrated in this he secreted a case-buile in his cell, but was discovered in this also.

It was found that the ball had passed above the right temple with an upward and backward tendency. The bullet, which had lodged near the top and back of the head, was extracted and found to be considerably flattened. There is little doubt, however, but that the ball was fired from the pistol found near the wounded man. The deceased's face was greatly discolored by the powder. An inquest was held upon the body yesterday morning at 11:30, when, after an examination of saveral witnesses, the following verdict was rendered : "That the said Patrick Fitzgerald came to his death about 3 o'clock p. m., January 15, 1880, in the police ambulance while in transit to the Providence Hospital, from a pistol-shot wound inflicted by himself, but we are unable to say whether it was accidental or suicide."

THE TRUE STATE

WOOLEN MARKET

With the single, exception of fron, the rise in prices of wool has been greater than in any other product. The fabrics that are now be ing consumed do not show any advance in price, as they were made out of last year's reducts of wool. The advance in Low and Medium Wools has been from 40 to 70 fer cent. In Delaine and Fleece Wools nearly 100 per cent. That these prices are not spelative can be best inferred from the fact that wool-growers have not for seven years past made a dollar on their wool crop, and in many instances failed to shear their shoop, as the prices realized DID NOT PAY FOR SHEARING. The past year's crop will be used in the manufacture of goods this year, and as such houses as FAULKNER, PAGE & Co. POMEROY & PEMURER and others of the largest numission houses in the world have bought at an average advance of 70 per cent, for the ise of their mills, and not for the purposes of peculation, it is certain BEYOND THE POS-SIBILITY OF A DOUBT, that all grades o roolen fabrics will be at least TWENTY-FIVI PER CENT. HIGHER NEXT SEASON,

In Linens and Cottons that are used in the nanufacture of garments the advance aver agea 25 per cent.

The great demand for Ready-Made Cloth ing, owing to the superior manner in which he better grades are now being made, ha aused an advance in the price of labor of ally 20 per cent.
